Dear CLSA San Diego Chapter,

I am greatly thankful for being awarded the San Diego Chapter Curtis M. Brown Scholarship at the 51<sup>th</sup> Annual CSUF GME Conference. I am grateful for the support and belief in me as a student and future surveyor. I have had a challenging year behind me, with two semesters of 22 units each, which was not only tough academically, but also financially as my status as an international student requires me to pay non-resident tuition fees. I have taken on a substantial amount of loan to obtain my desired education, and your kind contribution will considerably help reduce these loans. It goes to show that the "American Dream" is very much still alive, and that hard work and effort is recognized and awarded.

As mentioned, I feel deeply thankful and honored being selected to receive this award. This award motivates me to continue working hard academically and excel as a surveyor. I want to push myself harder and contribute to the society of surveying in a matter greater than myself and make personal efforts to help fellow students, volunteer where I can and do what I can to promote the profession.

Thank you!

Sincerely yours,

  
Andreas Torsvik
