General Meeting

October 21, 2009 at Best Western Seven Seas, Mission Valley

Pat opened the meeting, and reviewed the items discussed in the executive board meeting.

Armand Marois announced an opportunity to help the Boy Scouts out by providing pro bono services to locate pipelines and fixtures on their Mataguay Camp Site near Henshaw. Those interested can contact Armand.

Casey introduced Mike Hart and Roger Greene. Mike and Roger gave a presentation about the Certified Federal Surveyor program. Roger is the director of the program in Phoenix.

There are currently over 800 people enrolled in the CFedS program, representing 48 States, with approximately 278 surveyors certified so far.

A Certified Federal Surveyor (CFedS) is a state licensed land surveyor who has successfully completed the certification process established by the BLM Cadastral Survey Program. CFedS will perform a wide range of cadastral services within the state(s) he or she is licensed to practice land surveying. Certain services will be under the direction and control of the appropriate BLM Chief Cadastral Surveyor. CFedS will provide more avenues for accomplishing cadastral services for Indian trust assets and restricted fee lands.

The initial goal of the CFedS Program is to assure that all cadastral services executed in Indian country are performed in accordance with BLM standards. The long term goal is for all boundary surveys to be accomplished under the direction and control of the appropriate BLM State Office Cadastral Chief (Cadastral Chief). However, there is no requirement that BIA use a CFedS for cadastral services at this time.

The CFedS program is a voluntary program to train and certify professional licensed surveyors to perform boundary surveys and related cadastral services to basic federal surveying standards. Tribes, BIA, individuals, and other federal agencies will be encouraged to select surveyors from the CFedS Roster when contracting for boundary surveys or other cadastral services. The four certifications contained in the Standards for Indian Trust Lands Boundary Evidence must be completed in part, by a BLM Cadastral Surveyor or a CFedS. Of course, Tribes may choose to use only CFedS for all surveys of tribal land.

Registered/licensed land surveyors must complete a series of distance-learning training course equivalent to a three credit college course (approximately 120 hours to complete). Training includes seven modules with various problems, case studies and quizzes which must be completed. The training program prepares the surveyors for the six hour Certification Examination. The completion of annual advanced continuing education modules will be required to remain on the CFedS Roster.

More information can be found at www.cfedS.org.
